SI-TEX SVS-760CF

Colour sounder and chartplotter in one unit

What it is

The SVS-760CF combines the sounder and the chartplotter of the SI-TEX SVS-760 range in one unit. Watch the fish and the seabed and follow your course on the chart, on the same upright colour screen.

SVS-760 range

Main features

- 7 inch high definition colour screen, 480 by 800 pixels, upright format, readable in direct sunlight
- 600 watt sounder working on two frequencies, 50 and 200 kHz
- All digital sounder that cuts unwanted noise for a clearer picture of fish and the bottom
- Sounder views include bottom zoom, bottom lock, shift and split screen
- White line and black line settings to separate fish close to the bottom from the seabed
- Fish symbols, with alarms for depth, sea temperature and fish
- Chartplotter that runs both C-MAP MAX and Navionics Gold charts
- Stores 20,000 marks and waypoints, 100 routes and 50,000 track points
- Shows other vessels on the chart when an AIS receiver is connected
- Waterproof to the IPX6 standard
- Runs from 12 to 24 volts DC
- Simple menus, with the controls labelled in plain English
- Snap on sun cover included

In the box

Display unit, GPS antenna, sun cover, mounting bracket, knobs, power cable, owner's manual.

A transducer is needed for the sounder, and charts are bought separately. Ask Michael what is supplied and what suits your boat.
