SI-TEX SVS-760F

Colour echo sounder

What it is

The SVS-760F is the sounder of the SI-TEX SVS-760 range. It shows fish and the seabed under the boat on an upright colour screen, and suits working boats as well as keen recreational fishing.

SVS-760 range, SVS-760CF shown

Main features

- 7 inch high definition colour screen, 480 by 800 pixels, upright format, readable in direct sunlight
- 600 watt sounder working on two frequencies, 50 and 200 kHz
- All digital sounder that cuts unwanted noise for a clearer picture of fish and the bottom
- Adjusts by itself as the seabed and water conditions change, or set range and gain by hand for each frequency
- Sounder views include bottom zoom, bottom lock, shift and split screen
- White line and black line settings to separate fish close to the bottom from the seabed
- Fish symbols, with alarms for depth, sea temperature and fish
- Saves 10 screen pictures and 10 event points, so you can steer back to a fishing spot
- Waterproof to the IPX6 standard
- Runs from 12 to 24 volts DC
- Simple menus, with the controls labelled in plain English
- Snap on sun cover included

In the box

Display unit, sun cover, mounting bracket, knobs, power cable, owner's manual.

A transducer is needed and is listed by SI-TEX as an option. Ask Michael which one suits your boat.
